

Business Requirements:

1. Accurate and Up-to-Date Information about Doctor Availability:

Objective: Ensure that the project utilizes the most recent and reliable data to classify drugs, providing accurate and relevant information about doctor availability.

Requirement:

Implement a data management system that regularly updates and maintains accurate information on doctor schedules, ensuring that patients and medical professionals have real-time access to availability status.

2. Flexibility:

Objective: Develop a classification system that is flexible and capable of adapting to new drugs and changing information.

Requirement:

Implement a dynamic and easily modifiable classification framework that allows for seamless incorporation of new drugs and updates to existing information. This ensures the system remains adaptable to changes in medical practices.

3. Compliance:

Objective: Ensure that the project complies with all relevant laws and regulations, particularly FDA guidelines for classifying drugs.

Requirement:

Conduct a thorough assessment of FDA guidelines and other applicable regulations to establish a compliant drug classification system. Regularly update the system to align with any changes in regulations.

4. User-Friendly Interface:

Objective: Create a classification system with an easy-to-use and understandable interface for both medical professionals and patients.

Requirement:

Design a user-friendly interface that simplifies the process of accessing and understanding drug classification information. Conduct usability testing to ensure that the interface meets the needs of both medical professionals and patients.

These requirements serve as a foundation for the successful implementation of the CURA health service project. By addressing these aspects, the project can effectively provide accurate and up-to-date information about doctor availability, maintain flexibility for adapting to changes, ensure compliance with relevant regulations, and offer a user-friendly interface for seamless interaction by medical professionals and patients alike.
